Non-Detectable Underground Tape:

This tape is used for the protection, location and identification of underground utilities. Consists of a nominal 4 mil overall thickness, plastic film formulated to resist degradation due to acid and alkalies found in soils. This product is lead free.

Detectable Underground Tape:

Manufactured for identification and early warning of underground utilities lines. Acid and alkali resistant polyethylene warning tape is constructed of a 4.5 mil solid aluminum foil core with an imprinted warning legend that is completely encased to prevent ink rub-off. Highly reflective foil surface is visible from both sides of tape. Tape is supplied in 1000' rolls with widths of 2", 3" and 6". Tape contains the printed identification of the Utility Line buried below it and it conforms with APWA color code specifications for underground tape systems.
